<sup>1</sup>**University General Education Requirements:** Courses selected for Content Areas 1 & 2 must be in four different departments. One course in Content Area 4 must be designated as "international" (CA4-int). One course in Content Area 4 may also satisfy a Content Area 1 or Content Area 2 requirement, however credit is not awarded twice so be sure to make up the 3 credits with free electives in order to reach the required 128 credits total toward graduation.

<sup>2</sup>**Six credits in CHEG Electives** are satisfied by any 2000 level Chemical Engineering course. Research with CHEG faculty is commonly used to satisfy this area. Only six credits of CHEG research (independent study) may be applied toward degree requirements.

<sup>3</sup>**Six credits in Engineering Electives** are satisfied by any 2000-level or higher engineering course within any department of the School of Engineering.

<sup>4</sup>**Professional Requirement** is satisfied by at least three credits in Engineering, Science, or Math at 2000-level or higher.

<sup>5</sup>**MCB/Bio/Chem Course requirement** may be satisfied by one of the following courses: BIO 1107; BIO 1108; MCB 2000; MCB 3010; MCB 2610; CHEM 3563; CHEM 3332; CHEM 3564; or others by petition to Department Head.
